- Get ready! The clock has started and the chicken needs to find the best path to get out of the cave safely! - Help her by guiding her thru the path. - The little pieces need to be aligned properly to make a path for her. - The possible paths

are limited by what you can place. - The chicken will jump when she falls into a square, the bottom of the square can be broken and the chicken can land on different squares. - The chicken can not jump more than 4 squares, otherwise it will fall in the pool of water and you will have to start over from the last saved level. - The cave has four parts: The entrance, the tunnel, the middle pool and the exit. You have to find a good path for the chicken to walk thru the cave, she can not get out of the cave if you don't help her. - To navigate through the cave, you have to drag the floating path pieces to the correct position for the chicken to walk thru. - Watch out for the traps, the chicken can fall into a pool of water if the path pieces are not in their proper position. - Too many path pieces in a row or too many path pieces above the actual chicken will cause the chicken to fall in the water. - You have to move the path

pieces yourself! - Not all the pieces are visible at once and you can place path pieces by dragging one piece on the surface, it will then disappear (the pieces are not transparent). - Each level has an objective (to reach the exit) and the overall difficulty level. - Each level has multiple solutions you can reach. - Find a solution and click OK. - After you've solved a level, you can try to save the solution as a new level. - You can solve levels in random order. - You can save your progress at the game's startup. - Remember, the title shows the current level and the associated time for you to solve it.

About The Chickens - There are 4 chickens, each is looking for a different way to get out of the cave safely. - The 4 chickens make an input that are calculated by the game engine, when the condition for a chicken to jump is met, the chicken jumps and lands on a new position. - While the chicken is jumping,

the chicken can jump

Features Key:

- Eons ago, Mother Alder transmitted the Memories of Alder directly to Dawnsha, the first known artist to work with humans, and through her, Alder's essence flowed into numerous texts, including the Alder's Blood stories. Layered with Nightshade's lore, and finally assembled into one, seamless anthology,
- Earth, Water, Fire, Air, Sheol: Four distinct lands, each with its own distinct rules and gameplay mechanics, and character role. A land so rich, so strange, and so...divine is Alder's Blood
- The earth moves! All of Alder's Stones are twisted and warped, some to the point that they have melted at their cores and powered up into deadly Supernatural Energies. Now, a force field is needed to protect the world's inner flow, or the Four Elements will be dragged into chaos and a post-apocalyptic devastation.
- A heavy back drop of Darkness. Corruption and insanity creep into every crevice of the world, and even Alder's Blood can not contain them. Tragic events never end in the Alder's Blood world.
- Nightshade Souls, enigmatic creatures with enigmatic purposes. You'll experience their divergent paths and uncover their hidden stories. Who knows what unexpected surprises the souls of the world has in store for you!

In a [MUSIC DEVICE MAKERS] developed RPG, two capable heroes embark on a quest to restore order to a peaceful realm torn apart by a terrible civil war. They must strive to fulfill a promise made to a beautiful fallen star. Along the way they will face trials that will test their strength, their comrades and their

faith. Many emotions will fill the player as the story unfolds, twists and turns unfold, enemies assail and a showdown looms at the end... The title to this musical masterpiece is Star Ocean: Till the End of Time. This is the first soundtrack I've ever owned that sounds like it was made in my living room in my basement. It has such a cool old school feel to it that it's truly special. This soundtrack is an all-time classic. I can't recommend this soundtrack enough. This game has a special place in my gaming heart. I've played it on so many different systems. From the first Playstation to the 3DS. It's one of my all time favorite games. Going to the game for the music is only a small part of the love that I have for this game. There is a decent story and gameplay to it as well. You can play it in a variety of

different ways. The game is over 2 and a half hours long. It's a great game to play with a friend. So many of the games I listen to in my basements are simple in their audio design. Very basic and simplistic. I'm not sure where I've picked it up, but the quality I'm getting from this soundtrack is really nice. I've used this game for years. I still have the first Playstation. I always played it on that system. Later on when I was much more of a PC gaming person, I would use my PC for my games like this. This game is a very solid SRPG (Strategic RPG). It's really the more dynamic and action-oriented RPG's that I prefer. I prefer that to the strategy-heavy games. But having said that, the game is good. It's very hard, but I like it for the challenge. The story behind the game is actually quite interesting. It's a cool

story to base the game around. I can't imagine it being any better than this. It's a very very good soundtrack. This soundtrack is one of the best soundtracks I own. One of the most awesome games is Star Ocean: The Last Hope. The game
